The Cryptowall and Cryptolocker viruses have become more prevalent in past year. While we don't agree that "...investing in substantial anti-virus tools, including specialist Cryptolocker prevention kits" will keep your computer safe from infection, this article from [www.theguardian.com](http://www.theguardian.com/technology/2014-jun/02/how-to-avoid-cryptolocker-ransomware-virus) has some very good advice on avoiding a potential catastrophe.
