With technology changing so rapidly, it's imperative that students go back to school prepared with the tools and devices they need to be successful. School supply lists that once requested spiral notebooks and #2 pencils are being revised with requests for printers, ink, laptops and tablets. Even more so, access to high speed Internet is a must. In this guide, Consumer Reports explores the top five age appropriate devices to send your student back to school ready. Pair it with Yucca's blazing fast Internet, and your student will be ready for every paper, project and assignment coming their way this school year.

My overall experience with everyone at Yucca Telecom as Portales Main Street Program Executive Director and manager of the Historic Yam Theatre has been more than above and beyond my expectations! From the minute you walk into the door, you're greeted with, "How may we assist you?" Their entire team represents maximum quality service and is very knowledgeable. They are clear and precise in explaining all of their services as well as answering my questions. We need more dedicated individuals like Yucca Telecom hired in the realm of providing quality customer service! Thank you for making my job easier!
